SUMMARY

Experienced Senior Makerspace Facilitator with over six years of expertise in digital fabrication, design, and hands-on learning environments. Skilled in 3D printing, CNC routing, laser cutting, and rapid prototyping, with a strong background in program management, entrepreneurship development, and innovation-driven education. Passionate about mentoring makers, fostering creativity, and implementing makerspace programs that drive promotes digital fabrication learning, collaboration, and innovation.

EXPERIENCE SUMMARY

- Over 6 years of experience of Managing Institutional Fab Lab /Makerspace/Incubation centre.
- Over 6 years of Teaching experience in field of Digital fabrication Machine (i.e., Laser cutting, CNC Router and 3D printer) Operation skills and software training.
- Over 6 years of Teaching experience in field of Makerspace movement.
- Over 6 years of experience in field of ideation and prototyping.
- Over 6 years of experience in field of hand-on activity.
- Good Technical skills & Troubleshooting skills.
- Excellent communication and Student management skills.

EDUCATION

M.sc in Built environment and sustainability

Anant National University, Ahmedabad

Ahmedabad, INDIA

Nov 2025

Post Graduation Diploma program

Anant National University, Ahmedabad

Ahmedabad, INDIA

June 2022

FAB Academy

Fab lab Zero@ Vigyan Ashram

Pune, INDIA

Dropout, June 2019

B. tech – Aerospace Engineering

Siddhartha Institute of Aeronautical Engineering and Information Technology

Bangalore, INDIA

June 2016

12th – BSEB

B.N. Collegiate, Patna, Bihar

Patna, INDIA

June 2009

10th – BSEB

Boys High School, Nirmali, Bihar

Patna, INDIA

June 2007

EXPERIENCE

Plaksha university

Senior Makerspace Facilitator at Makerspace@Plaksha

Mohali, INDIA

Nov 2021 – Nov, 2024

- **Joined in the founding year to establish and operationalize a 5,000+ sq. ft Makerspace**, coordinating setup, procurement, and execution of key processes.
- **Developed and enforced SOPs** for all machines, ensuring safe and efficient usage by **500+ students and 50+ faculty**.
- **Managed procurement and inventory of 50+ Fab Lab standard machines**, overseeing operations for a 2-year program with a **₹5 Cr budget**.
- **Trained 500+ students and 50+ faculty** in prototyping, 3D printing, laser cutting, 3D scanning, Arduino, Raspberry Pi, and hands-on technology.
- **Facilitated ILGC courses and mentored 100+ students** for Grand Challenge programs, fostering creativity, problem-solving, and innovation.
- **Led 20+ outreach programs and school visits**, impacting **1,000+ students** and coordinating YTS initiatives.
- **Managed daily Makerspace operations, visitor facilitation, and collaborative projects** with the Centre of Excellence.
- **Developed 10+ interactive demonstrations** to engage visitors and promote Maker culture.

CMR University

Makerspace Facilitator at FabLab/Makerspace@CMRIT

Bangalore, INDIA

March 2017 – April 2019

- **Operationalized Makerspace facilities**, managing inventory of 50+ machines, procurement, and daily operations, fostering Maker culture for **500+ students and 50+ faculty**.
- **Launched the Young Undergraduate Engineer Maker Program**, integrating hands-on projects with first-year engineering curriculum, engaging **2,000+ students annually**.
- **Designed and delivered curriculum** for operating 3D printers, CNC routers, and laser cutting machines, training **500+ students and 50+ faculty**.
- **Provided design, fabrication, and prototyping support** for **100+ project teams**, mentoring students and faculty in innovation and rapid prototyping.
- **Initiated Maker startup ecosystem** in collaboration with the incubation centre, mentoring and funding **20+ potential startups**, and documenting incubated ventures per MIC standards.
- **Planned and executed signature events** including Bangalore Design Week, Maker Something, workshops, and international student events, reaching **1,000+ participants**.
- **Anchored workshops, expert-led webinars, and weekly mentorship call** across 5+ branches, driving end-to-end program execution from outreach to felicitation.
- **Maintained NAAC documentation** and monitored program metrics: ideas submitted, mentoring hours, prototypes developed, startups incubated, and seed-funded ventures.
- **Supported prototyping for early-stage alumni startups**, including a venture later featured on **Shark Tank India Season 2**.
- **Facilitated inter-department collaboration** to maximize student and faculty innovation initiatives.

- Develop curriculum on operating 3D printer, CNC Router, Laser cutting machine.
- Developed and delivered hands-on curriculum for operating **3D printers, CNC routers, and laser cutting machines** for **grades 6–10 rural students**, cohort size of **~40 students per batch**.
- Initiated and documented the vision and roadmap for the **Design Studio @ Innovation Hub**, establishing structured prototyping and innovation workflows.
- Planned and executed prototype development projects, showcasing student work to **national and international delegates**.
- Mentored students in **design thinking, STEM, STEAM, and Maker projects**, fostering creativity and problem-solving.
- Prepared and maintained documentation for **Fab Lab approval**, project execution, and skill-level assessment of student cohorts.

Publication

- PAPER Title “**Village Scio –Economic Entrepreneurship Program**” page no. 144-148 Published In proceedings of national conference on issues and challenge in rural development.

Project

- **3D-Printed Scale Models of GSLV and PSLV (1:300)** – Modified open-source designs to create accurate, hands-on prototypes for demonstration and educational purposes, showcasing advanced **3D printing, CAD, and prototyping skills**.
- **Eiffel Tower Scale Model (2 ft, MDF)** – Designed a **2D CAD model** and fabricated using **laser cutting**, creating an accurate scaled replica with attention to dimensions, assembly, and structural detail.
- **UGV (Unmanned Ground Vehicle) Prototype** – Designed and built a **robotic ground vehicle** with integrated **sensors, microcontrollers (Arduino/Raspberry Pi), and motor control**, demonstrating autonomous navigation and remote operation capabilities.
- **Hovercraft Prototype** – Designed and built a small-scale hovercraft using **CAD, 3D-printed components, and lightweight materials**, demonstrating **air-cushion mechanics, propulsion, and hands-on engineering skills**.
- **RC Aircraft Prototype** – Designed, built, and tested a **remote-controlled aircraft** using lightweight materials and electronics, integrating **aerodynamic principles, motor control, and flight testing**, demonstrating hands-on engineering and prototyping skills.

Achievements

- **Recognized as Mentor of Change** by **Atal Innovation Mission (AIM), NITI Aayog, Government of India**, since 2018, for mentoring student innovators and supporting entrepreneurship initiatives
- Appreciate by NASA Scientist during High School Teacher Training Program during Space Festival Bharathiar University Coimbatore and Received 100 Spectrograph kit.
- Technology demonstration of unmanned system sustainable platform for crop monitoring / surveillance and reconnaissance during ANVESHNA 25-27, February 2015.
- NASSCOM Tech-Maker under 50 and U25 startup.

Technical Proficiency

- **Software & Tools:** Windows OS, Microsoft Office Suite, G Suite, project and file management.
- **Programming & Coding:** HTML, CSS, Bootstrap, Processing, Python.
- **Fab Lab / Makerspace Tools:** 3D Printers, Laser Cutters, CNC Routers, 3D Scanners, Arduino, Raspberry Pi, Electronics Prototyping Kits.
- **Design & Problem-Solving:** System Thinking, Design Thinking, MVP development, Why-Tree analysis.
- **Emerging Technologies:** AI/ML fundamentals, IoT development, AR/VR applications.

Strengths

- Goal-oriented professional with strong **interpersonal, organizational, and analytical skills**.
- Passionate maker with enthusiasm to learn, **collaborative, solution-driven, multi-tasker, and interactive**.

Hobbies

- Teaching, Model Making, Prototyping, and Creative DIY Projects.

Declaration

The above details given are true to my knowledge and belief.

Anand Kishor Verma
